

PRESS RELEASE

June 14, 2022

ENASP is a partner of the Rural Pact

Strengthening rural areas is a concern of all agricultural social security institutions in Europe. That is why ENASP is an official partner of the Rural Pact initiated by the European Commission.

Shortly before the start of the Rural Pact Conference on 15 and 16 June in Brussels, Martin Empl, ENASP President, emphasises: "As a partner of the Rural Pact, we can present the specific potential of the agricultural social insurance institutions and our national and European networks for the sustainable development of rural areas. Our self-governing and solidarity-based non-profit organisations are important actors in rural areas that have an impact beyond the circle of insured persons. The economic, health-promoting and culture-shaping potential for the countries of Europe is considerable."
